WINTER 2019

## Happy New Year!

Many in the astrological field are putting a great deal of focus on the year 2020 and, yes, there will be many important and intense changes in 2020, but let's not forget 2019! It's time to be in the now and to pay attention to what this year holds for us, both globally and personally.

We started 2019 with a partial solar eclipse on January 6th. We can expect a total lunar eclipse on January 21st. Total eclipses are always more powerful than partial eclipses. This year there will be three eclipse seasons. These eclipses will bring many changes and upsets dealing with royalty, weather, finances, people and nature. We can also expect many changes involving women and surprises in the White House. It seems to me that 2019 has much to get our attention.

Another eclipse date is July 2nd and this one will last 4 minutes and 33 seconds, the longest one in six years, and includes the possibility of earthquakes in the Oklahoma region. On December 26th there will be an annular solar eclipse over Saudi Arabia, India and Southeast Asia. This could impact the stock markets as we head into 2020 as Jupiter will cross the ecliptic, from north to south, which in the past, activated a market turn down or a straightforward crash. Caution is advised in investments.

There are currently three planets: Jupiter, Saturn and Neptune transiting the Earth, all of them in their own signs, i.e., Jupiter rules Sagittarius, Saturn rules Capricorn and Neptune rules Pisces. When planets are in their own signs they are very powerful as it is the full expression of that planet. There are two planets changing signs: Chiron is moving from Pisces to Aries and Uranus is moving from Aries into Taurus. There will be great energy around healing (Chiron in Aries) and money, banks and finances will experience sudden changes (Uranus in Taurus). We are seeking the bigger picture of life (Sagittarius); we must use our discipline (Capricorn) and be compassionate (Pisces) if we are to create positive change, globally and personally.

**What does all of this mean for you and me?** Where do these eclipses fall in your astrological chart? 2019 is a year to examine where we are in our lives; how do we handle challenging times and yet still enjoy our lives? Having your astrological chart is of great value as times are intense and great changes are occurring. What is your life purpose? Are you living it? The time is now for us to come together and help create the changes that will work for everyone, not just a few. Astrology is a precious tool for guidance and confirmation about your universal pattern. Come and spend an hour discussing your life – you will be happy that you did as we all move forward dealing with change.

### Dates to Remember

Mercury retrogrades happen 3 to 4 times a year. It's a good time for reflection, introspection and study. It's not a good time to try to get things accomplished! Hold off on scheduling appointments, installing any new electronics or dealing with any type of communications.

Mercury is the communication planet. For those who don't believe in Mercury retrograde -- it's not a belief, it's a fact. When in retrograde, it's telling us to slow down, take a breath and spend time contemplating things you would like to occur once it goes direct again.

#### 2019 Mercury Retrograde Dates:

- March 5 – March 28 in Pisces
- July 8 in Leo – August 1 in Cancer
- October 31 – November 20 in Scorpio

Mark these dates on your calendar! Avoid planning things while Mercury is in retrograde—instead, work behind the scenes to avoid frustration.
